

Cloud Optimization for AWS

Strategic Cost Reduction & Optimization

With more and more businesses leveraging the power and flexibility of Amazon Web Services (AWS), many businesses struggle to find the optimal balance of performance and cost. With a host of new architectural, operational, and financial considerations, internal technology teams lack the time and specialized knowledge to confidently track and manage cloud costs without sacrificing performance.

At Mission, our job is to provide you the insight you need to approach your infrastructure costs strategically. We'll help you understand your cloud spend, with detailed, continuous cost attribution by workload, business unit, or cost center. We'll help you optimize Reserved Instances and identify other ways to reduce your spend with surgical precision, without affecting your developers or customers. And we'll provide ongoing recommendations on cost optimization and reduction.

The Benefits

Gain Insight Into Cloud Costs

With easy-to understand monthly invoicing, you'll know what you're spending and what you're getting in return.

Improve Cost Allocation

Understand-and reduce-your true program costs by allocating cloud spend with more granularity.

Reduce Spend Strategically

Leverage architectural improvements and financial instruments to reduce your annual cloud spend.

Regular Recommendations

Mission Cloud Optimization includes regularly scheduled consultations with your Cost Optimization Professional.

About Mission

We are an AWS Partner Network (APN) Premier Consulting Partner and AWS Managed Service Provider (MSP) with deep know-how in launching and leveraging the power of the cloud. We believe that cloud technology is the greatest business transformation tool, and our mission is to help you harness that power to transform your business and to make your company's mission a reality.
