

AWS Migrations: Move Your 2008 SQL/Windows Server to AWS

OVERVIEW

The End of Support (EOS) for SQL Server 2008 and Windows Server 2008 is approaching — July 9, 2019 and January 14, 2020, respectively. No new patches or security updates means exposure to cyber attacks, as well as the risk of non-compliance with regulatory bodies and new legislation. While migrations can be daunting and disruptive, we are rapidly reaching the point where they are no longer optional — let the team of experts at Mission help take the pain out of this necessary transition.
