Mission and AWS Security Insights:
Powered by Alert Logic

Overview

Now more than ever, it's critically important for businesses to bring clear focus to cybersecurity. Gain insight into your AWS account security posture and stay ahead of the game with a new visibility and security assessment solution from AWS and Mission, and powered by Alert Logic.

How it Works

Alert Logic connects to your account with an IAM role, and leverages the industry-leading Center for Internet Security (CIS) Foundations Benchmark to produce a report identifying all outstanding security issues. Mission's team of AWS-certified security experts then works with you to interpret the report, identify a path for remediation, and develop a technical roadmap that aligns with all best practices going forward.

Benefits

1. Peace of Mind

Security is a major concern in the enterprise landscape - the global average cost of a data breach is $3.86 million. This report identifies vulnerabilities so you know exactly how secure your company is, and what you can do to improve.

2. Accelerate Performance

Leverage the industry-leading CIS Foundations Benchmark to ensure you meet all security and compliance requirements faster.

3. Stay Ahead of the Competition

Mission's team of AWS experts specializes in both remediating security issues and developing proactive technology roadmaps, so you can stay ahead of the game.

Up to One Hour of Certified AWS Expertise for Free

With our Solutions Architect on Demand program, you have one full hour to discuss your cloud security concerns with a certified AWS cloud expert at no cost. While we're at it, we can work with you to get more performance and efficiency out of your cloud environment. Our one-hour session is useful for Q&A, problem solving, and discovery. We can also begin discussions surrounding:

- **Strategic Consulting:** Building a Strategic Technology roadmap that allows you to meet your short- and long-term goals.
- **Managed DevOps:** An iterative, agile approach to infrastructure development and project implementation.

Schedule your free SA On-Demand consultation here.

"Mission delivered a customized security and monitoring solution to fit our exact needs. Mission is our trusted advisor for cloud architecting, extremely dependable, and flexible with our various projects over the past year."

-- Michael Murphy | Cloud Infrastructure Architect at FAST
